STEPHEN RAY GUEDEA

Software Developer

About Me

If in coding is where you can truly learn from your mistakes, I hope I'm never right. I'm a self-motivated person that drives off of a fear of failure. But in coding, I can fail every now and then, because that's how I'll become better. I may not know all the answers or have all the solutions, but I'm inspired to learn this ever-growing industry. That's the beauty of coding, there's always something new to learn. As a developer, you learn to fail, and you fail to learn.
